# Mygo Stander

Infinite positioning to help kids  
stand with confidence

Supporting Children

# Stand out from the crowd in the true 3-in-1 stander

**Mygo Stander** provides the best standing therapy solution on the market – it is the only 3-in-1 stander which delivers truly excellent positioning whether a child is in prone, supine or upright. **Mygo Stander** doesn't compromise on quality, ensuring children get the support and comfort they need to enjoy standing and the benefits this brings.

## OUTSTANDING ADJUSTABILITY TO ACCOMMODATE HIP, KNEE AND ANKLE CONTRACTURES

- 
- Mygo Stander's footplates and knee supports uniquely move together, taking the strain off the hip flexors, hamstrings and gastrocnemius muscles, ensuring children stand in a more upright functional posture
  - This linked movement opens up standing therapy to children who were previously unsuitable because of their contractures

## DESIGNED TO IMPROVE UPPER LIMB FUNCTION, INCREASING ACTIVITY AND INDEPENDENCE

- The ergonomically designed chest pad replicates the shape of the rib cage allowing the shoulder girdle to freely protract and retract in prone standing
- Combined with Mygo Stander's lower tray height and a more upright head and chest position, the child's upper limb function is significantly improved. The child has space to move, supporting freer arm movement and an increased ability to carry out everyday activities such as feeding themselves, playing, self-care tasks and communicating with others

## MODULAR STANDER WHICH CAN BE TAILORED TO MEET SPECIFIC NEEDS

- Mygo Stander can be easily configured to evolve with the child as they grow and their postural support needs and therapy goals change
- An extensive range of options and accessories enable an individualised fit, ensuring the best possible posture is achieved e.g., pelvic de-rotation belts, chest/hip harnesses, knee straps and a variety of laterals

# Technical Information
